LOADING AND UNLOADING OF
MATERIALS

ELECTRICIAN

DOES ELECTRICAL FITTINGS

PLUMBER

FITS WATER PIPES

L-13, A RIVER'S TALE

CLASS IV , EVS

A river starts from a glacier.

It is a huge body of frozen water.

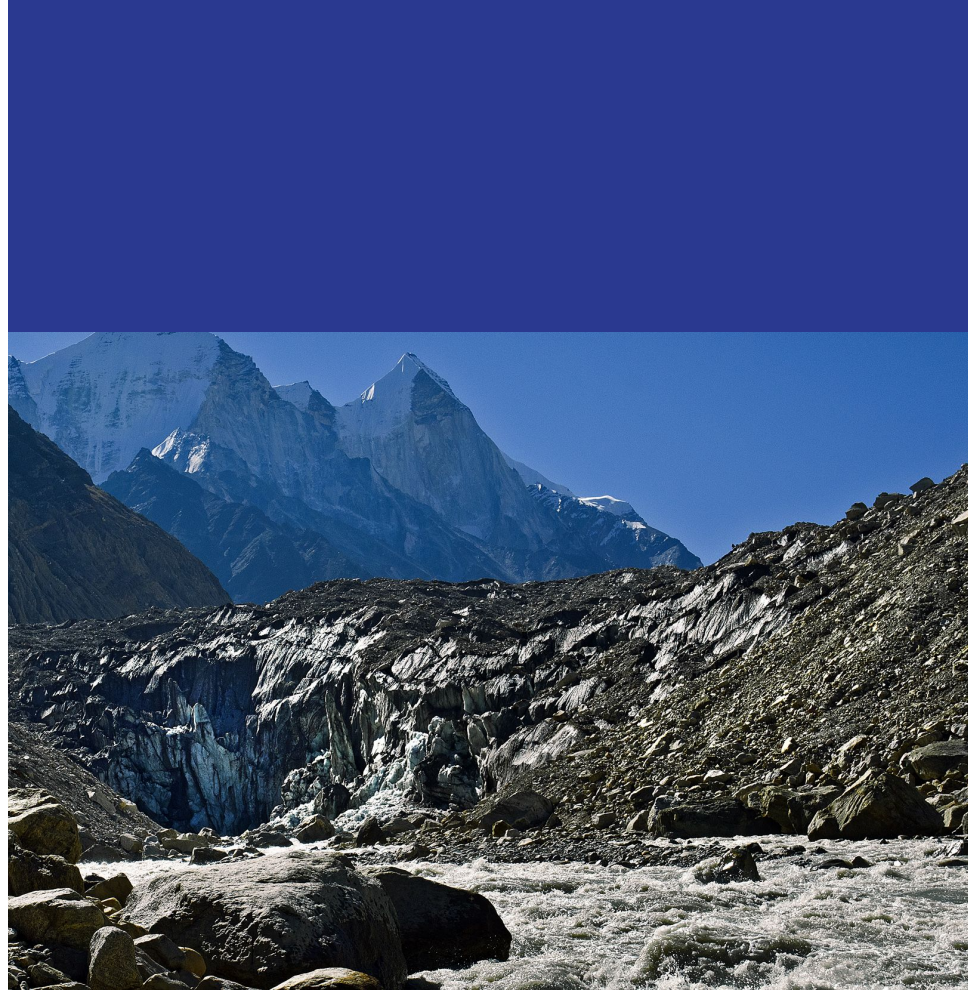

Gangotri glacier

River Ganga originates from here.

RIVERS FLOW DOWN FROM MOUNTAINS

HIMALAYAS ARE MOUNTAIN
RANGES FROM WHICH MANY
RIVERS ORIGINATE

RIVERS REACH
THE PLAINS,
LIKE
HARIDWAR
AND VARANASI

Plains are
heavily
populated.
Rivers get
polluted.

Factory waste
has harmful
chemicals that
harm fishes

Pollution kills
fishes and
plants in rivers

Floods in rivers
cause loss of
life and
property.

A river's journey
ends in sea.

The impurities from the water may be removed by :
